**SKANSKA**

Make your  
mark – **build**  
**your career**

If you would like to **be a part of** the company which makes a **real difference** to the way construction is delivered, by **combining skills** and **expertise** and working closely with our **clients, partners** and with the **community**, then Skanska UK is **the place to start your career!**

We are one of the UK's largest construction companies. We combine design, building, civil engineering and building services with a wide range of specialist skills. Skanska UK is part of Skanska, one of the world's leading construction groups with over 55,000 employees in Sweden, Finland, Denmark, Poland, the Czech Republic, the UK, US and Latin America.

In the UK we are currently working on many high-profile projects e.g. widening the M25 (the biggest highway project in Europe), DLR, Heron Tower, the Barts and Royal London Hospitals, Derby Hospital, Walsall Hospital and Bristol Schools. In many ways Skanska remains at the forefront of the industry in the UK.

Sandeep Cheema  
Graduate Quantity Surveyor  
Loughborough University  
Graduated in 2008

Apart of  
Skanska's  
Green  
Initiative

### Skanska UK Plc – some facts

Everything that Skanska does is governed by their Code of Conduct which sets out the responsibilities to the countries, communities and environments in which Skanska operates, to its employees, business partners and to society in general.

Skanska's success has led to numerous awards for both the technical quality of our work, but more importantly how Skanska approach our work. This includes being ranked Fourth Best Green Company in the UK by The Sunday Times in 2009 (we have launched Green Car Policy as well as Skanska Green Initiative).

We were chosen the 7th choice of Graduates across the UK's construction companies in Target Jobs Survey. In 2009 we were ranked as one of the UK's Top Ten Graduate Recruiters in Construction & Civil engineering and Quantity Surveying.

### Make your mark

Graduates at Skanska can start their careers in different areas including: construction in public and private sectors, infrastructure projects, ground and geotechnical engineering, facilities, utilities, cementation or our in-house engineering design consultancy.

### Build your career

All graduates in Skanska get substantial support with their development to gain professional qualifications. Our graduates also get support in developing key personal skills and behaviours which will support their career progression.

That is only the beginning to what we hope is a successful career in Skanska that could potentially include opportunities to work outside the UK. We are keen to develop senior managers from within and graduates are very much part of our talent pool for the future.
