

## Skanska Green Construction

- All of Skanska's UK operations are covered by the international standard ISO 14001
- Over 1000 staff have completed an on-line sustainability course.
- The consolidation centre at the Barts Hospital project in London has reduced traffic movement by 75%.
- At the Royal London Hospital site, Clark and Fenn Skanska has introduced a recycling process for all the mineral fibre ceiling tiles.
- In 2008 84% of site waste produced was recycled on-site or sent for recycling. Only 16% was sent to landfill.
